

Choosing the right size bubble

Air Cell Size

Rule of Thumb: The larger the item be packaged, the larger the size of the bubble that should be used.

Product	Size	(inches)	Suggested Uses
VPC	Small	3/16	Interleaving and/or surface protection. Best for wrapping small, lightweight items and multiple items in a carton.
MPC	Medium	5/16	Cushioning of fragile, medium weight products. Provides a combination of surface protection, shock absorption and void fill
LPC	Large	1/2	Multi-purpose cushioning applications. Usually sold as a void fill item.

Small

3/16 inch

Medium

5/16 inch

Large

1/2 inch
